

## STRATA 5000 SERIES

Toshiba's 5000 series of digital and IP featurephones offer a wide choice of functionality, and range from a low-cost entry-level digital option through to a sophisticated large display IP featurephone with 10 flexible keys.

Supremely robust and reliable, the 5000 series of featurephones from Toshiba provide a range of functionality to the user, helping improve productivity and efficiency.

### Strata 5000 series of featurephones

Broad range of robust digital and IP featurephones to suit the users individual requirements.

### Key benefits:

- » Red/Green Busy Lamp Field (BLF) indication shows who is on the phone or available.
- » Red/Green ringing LED for easy distinction of internal and external calls.
- » Context sensitive soft keys provide intelligent feature presentation for applications such as voicemail.
- » 10 different ring tones provide simple identification of the type of call.
- » Direct Dial-In (DDI) numbers can be assigned a specific ring tone for particular projects.
- » Access to shared mailboxes through multiple message waiting indication.
- » One-touch group pick-up with easy recall of calls placed on hold.
- » On-screen directory dialling on LCD featurephones reduces the need to search for numbers.
- » Easy printing and changing of paper inserts, and easy expansion of flexible buttons through Add-on Modules (ADM) and Direct Station Select (DSS), including a self-labelling ADM.
- » Flexible and one-touch keys can be configured for regularly used functions.
- » Contact centre supervisors can monitor calls for quality purposes, without the handset picking up background noise.
- » Integrated headset interface to plug supported headsets directly into the featurephone, without the need for an adapter.
- » Uniform design for both digital and IP handsets, for consistent look and feel throughout the organisation.
- » IP5122F-SDC provides a separate analogue line allowing remote workers to dial out in the event of network failure, and ensures that emergency calls are patched through to local response services.
- » Built-in Gigabit Ethernet switch on IP5000 models, delivering high speed network connections directly to the desktop.

# DP5000 DIGITAL FEATUREPHONES

**DP5008F**  
Entry level digital featurephone with 2 programmable keys.

**DP5018F-S**  
Digital hands-free featurephone with 10 programmable keys.

**DP5122F-SD**  
Digital hands-free featurephone with 10 programmable keys and 4-line LCD backlit display. Also available without backlight (DP5022F-SD).

**DP5130F-SDL**  
Digital hands-free featurephone with 10 programmable keys and a large 9-line, backlit, LCD display for full on-screen prompts.

**DP5132F-SD**  
Digital hands-free featurephone with 20 programmable keys and 4-line LCD backlit display. Also available without backlight (DP5032F-SD).

**5000 Series Side View**  
With the exception of the DP5008F, the 5000 series allows the user to adjust the angle of the main unit and features a tilt stand.

# IP5000 IP FEATUREPHONES

## IP5122F-SD

IP hands-free featurephone with 10 programmable keys and a backlit 4-line display. Also available without backlight (IP5022F-SD).

## IP5122F-SDC

IP hands-free featurephone with 10 programmable keys, a backlit 4-line display and separate analogue line interface.

## IP5131F-SDL

IP hands-free featurephone with 10 programmable keys, and a large 9-line, backlit LCD display for full on-screen prompts.

## IP5132F-SD

IP hands-free featurephone with 20 programmable keys and 4-line backlit display.

Toshiba's 5000 series of featurephones are equipped with the following as standard:

- » Microphone speaker key
- » Enhanced mute (mic and handset)
- » Hold key
- » Conference/transfer key
- » Message waiting LED
- » Last number redial
- » Alphanumeric keys
- » Volume control keys
- » Up to 100 personal speed dials
- » Up to 800 system speed dials
- » Integrated headset interface
- » Redial key
- » Programmable keys
- » Two colour LED status indicator
- » Hot dialling
- » Adjustable button beeps
- » Room noise sensitivity
- » Optional call waiting
- » Angle adjustment and built-in stand
- » Soft keys (display only)
- » Informative display (display only)
- » 4-9 line x 24 character LCD (display only)

In addition to the above, Toshiba's IP5000 featurephones have a built-in Gigabit Ethernet switch which supports high speed network connections directly to the desktop. This is also capable of auto-sensing network speed for 10, 100 and 1,000 Mbps.

## Add-on Modules (ADM)

Toshiba also provide two types of Add-on Modules (a 20-key paper label and 10-key LCD version), and 60-key Direct Station Select (DSS) consoles to provide more programmable buttons to our 5000 series of featurephones. These programmable buttons can be used for direct extension selection, Busy Lamp Field (BLF) functionality, one-touch call processing or frequently used calling functions.

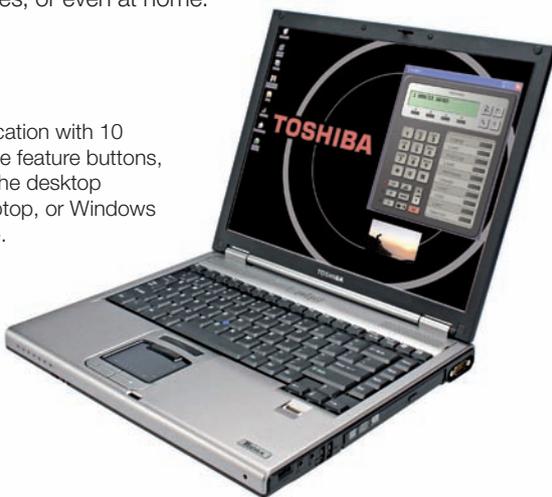

## Key benefits:

- » Allows users to quickly and easily transfer calls to the desired extensions.
- » Provides visual confirmation of who is available to take calls, who is already on a call, or who is on Do Not Disturb (DND).
- » Maximises customer satisfaction, and increases efficiency as calls can be handled quickly and efficiently.
- » Self-labelling ADM allows quick assignment of speed dials etc. for hot desking (hot desking is only available on IP5000 featurephones).

## SoftIPT

Toshiba's IP series of featurephones also includes a SoftIPT which allows users to make and receive calls from their PC or laptop, or Windows Mobile® device. It is particularly useful for individuals who may work in a variety of locations including branch offices, or even at home.

SoftIPT application with 10 programmable feature buttons, available for the desktop computer, laptop, or Windows Mobile device.

The SoftIPT is equipped with the following as standard:
